HAND BLENDER B 781

INSTRUCTION MANUAL

### COMFORT

This blender has a well-balanced gravity center, a stretch cord, and an ergonomic anti-slip handle.

A clever casing design minimizes vibration and noise.

The appliance is operated by a single push-button. All this ensures operational convenience.

### DURABILITY

All-metal casing ensures a long service life and contributes to the blender's distinctive appearance.

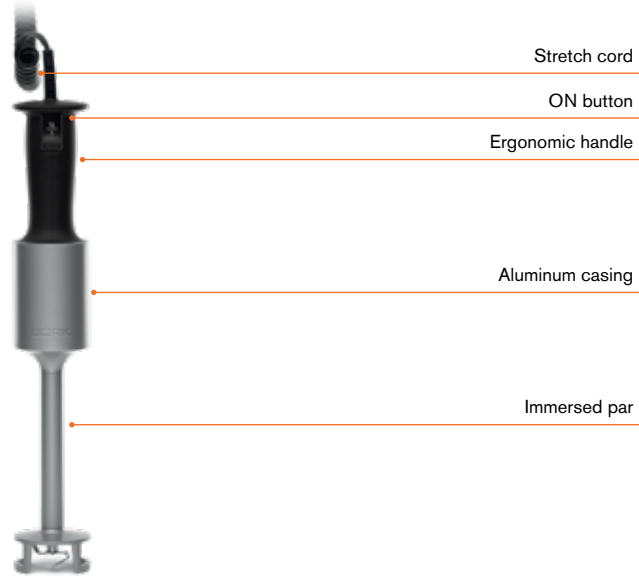

### VERSATILITY

Thanks to a set of attachments including a whisk, a chopping knife and an anti-spill attachment you can beat light and airy mixtures, mash, chop fruit and vegetables, whisk eggs and much more.

### THE QUALITY OF SWITZERLAND

Innovative motor, developed by the top engineers and manufactured in Switzerland helps to minimize vibration therefore the beating process is almost silent.

Chopping knife

Whisk attachment

#### BEFORE THE FIRST USE

- Before the first use remove and safely dispose the packaging materials.
- Wash the metal part of the hand blender and the attachments with neutral detergent in warm soapy water.
- Avoid water on the handle and inside the casing.

#### ELECTRICAL SAFETY PRECAUTIONS

- Do not touch the power cord plug with wet hands.
- Do not pull the cord when unplugging the device; always take the power plug.

To remove and change an attachment, always unplug the blender first.

- Choose and place the required attachment at that the locking device on the blender's base shall engage the groove.
- Press the required attachment until tight.
- Thanks to the special shape of the slot the attachment is not released during operation.
- Just pull on to remove.

#### ANTI-SPILL ATTACHMENT

- To blend small portions before fixing the blades insert the attachment into the slot in the base of the immersed part.
- To remove the attachment, press the sides in the metal frames of the slots on the base of the immersed part.

Be careful as the blades are extremely sharp.

#### ON/OFF

Plug the blender in.

Immerse the blender into the product to be processed before switching it on.

- For the low speed slide the ON button halfway. For the high speed slide the ON button until stop.
- To stop the operation release the ON button.

Switch the blender off before taking it out of the product.

- Unplug the appliance after use and let it cool down before taking it away for storage.

#### MAINTENANCE

Avoid moisture on the handle.

The appliance must not be used on rough surfaces, for example in cast-iron cookware. This can result in the blender paint coating damage.

The immersed part can get discolored upon contact with coloring product.

The recommended time of continuous operation is about 1 minute.

The maximum blender operation time should not exceed 5 minutes.

Make at least 2 minutes break for cooling down before restart.

## CLEANING

- Unplug the blender before cleaning.
- The blender's blades are very sharp and require extremely careful handling.
- Remove the attachment and wash it by hand.
- If the immersed part also needs to be cleaned wash it with a small amount of water, avoid moisture on the handle and inside the casing.

Do not use steel wool, chemicals, abrasive cleansers and agents containing sulfanilamide or citric acid for blender cleaning.

- For easy cleaning of the immersed part after processing nonfat product just immerse it into warm water and switch the appliance on for 10 seconds.

## STORAGE

Store the appliance in a dry cool place away from acids and alkalis storage areas at temperature from 5 to 30°C and relative humidity 65% max.

Keep the appliance away from direct sunlight and avoid significant temperature differences.

- Carefully read this operational manual as it contains important safety, use and maintenance information. Keep this manual in a safe place. BORK company is not liable for any damages resulting from infringement of the safety rules.
- Before the blender use make sure that the mains supply specifications comply with the ones specified on the appliance rating plate.
- The blender is intended only for home use.
- This appliance is not intended for use by individuals (children included) with sensory system or mental disabilities as well as unexperienced and unskilled individuals.
- Before use make sure that the blender is properly and entirely assembled.
- Before use wash all removable parts.
- Be careful when handling the chopping blades, they are extremely sharp.
- Do not touch the moving part of the blender to avoid injury and the appliance damage.

- Do not blend very hot food.
- Always unplug the appliance before assembly, dismantling and cleaning as well as after use.
- Do not use the hand blender for grinding the coffee beans of any other hard product for example nutmeg. Processing hard product can result in the blades damage.
- The blade, the whisking and the anti-spill attachments are subject to normal wear, the useful life depends on careful handling and frequency of use.
- Never immerse the blender's base with the motor, the power cord or the power plug in water or any other liquid. Avoid condensate formation thereon; do not use the appliance in areas with high humidity.
- Avoid foreign objects of liquids penetration in the appliance casing that it can result in damage.
- Do not remove or damage the nameplate containing information of the appliance and its serial number. It is required for the appliance identification in case of any failure.

- Do not use steel wool, abrasive sponges, chemicals, abrasive cleansers, as well as any agents and tools that are able to damage or scratch the blender.
- Do not use or store the appliance at temperature below 0C° or high humidity.
- The appliance shall be transported only in original package securely fixed.
- Dispose the appliance in accordance with the rules and regulations in force in the country of distribution.
